WELCOME TO THE TEAM

Engelhart Racing is Utah's premiere Birel ART dealer and is conveniently located on site at Utah Motorsports Campus. We offer chassis and engine sales, service and maintenance, on-site storage and an extensive track support and coaching program including kart rentals for practice or race weekends.

We have competed in many of the premier National Championship Series in karting, raced Formula Cars and Touring Cars, and have been coaching all over the US and the world. We've made drivers faster in IMSA Porsche GT3 Cup Challenge, Chinese Formula 4, Japanese Formula 3, Kart Championships, and more. We've coached everyone from first-time drivers to ex-Formula 1 drivers so no matter your skill level we can find speed for you!

BENEFITS

Team garage

We provide a dedicated pit space including working tables in our paddock garage.

Coaching and setup advice

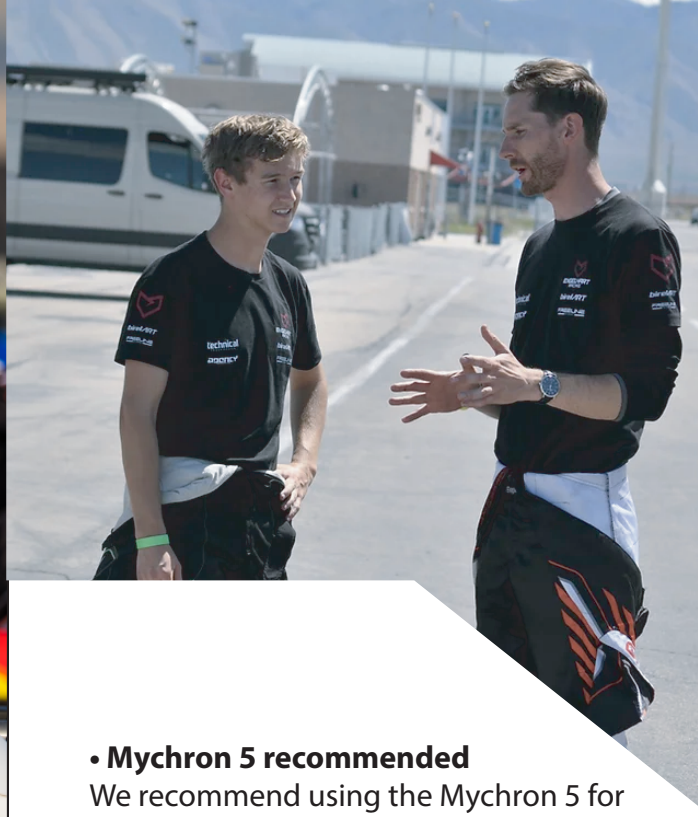

As a driver under our tent you have full access to our kart setup and driver coaching service.

Spare parts

Drivers in our tent program have priority access to our spare parts. Whether it's a simple gear change or a bent axle we have you covered.

Access to tools and equipment

We have most specialty equipment needed including tire changing and alignment equipment available to you at the track.

RESPONSIBILITIES

- **Keep kart and equipment clean**

As a member of this program, it is your job to maintain the professional image of the team. Please be conscious of your kart's appearance and strive to keep it clean and shining throughout the race events.

- **Team shirts will be provided**

Please wear your team shirt during official race day events.

- **Mychron 5 recommended**

We recommend using the Mychron 5 for your onboard data system. This is the most popular system for karting and will allow for the most comprehensive data and review sessions.

- **Cambox camera recommended**

We are recommending the Cambox system for the 2023 season. This camera mounts under your visor and gives the best view for coaching sessions as it allows us to see from the driver's perspective.

TEAM SUITS

- **Custom team suits are available**

Custom team suits are custom fitted to each individual driver and will have the driver's name on the belt.

Price \$450, lead time 4-6 weeks.
